---

## Career Objective

Aspiring AI/ML Developer seeking to contribute to scalable AI-powered platforms using Python, Flask, and machine learning frameworks. Passionate about applying ML algorithms to real-world problems and deploying production-ready solutions on cloud infrastructure.

---

## Technical Skills

- **Languages:** Python, C++, Java
  - **ML Libraries:** scikit-learn, NumPy, Pandas
  - **Backend:** Flask, Node.js, Express.js
  - **Cloud & DevOps:** Docker, AWS EC2, GitHub Actions
  - **Databases:** MongoDB, MySQL
  - **Concepts:** OOP, Data Structures, REST APIs, Model Evaluation, Agile
- 

## Projects

- **ML Movie Recommender** – Python, Flask, scikit-learn  
Trained and deployed a recommendation model with Flask REST API.
  - **TaskFlow** – Flask, Docker, GitHub Actions, AWS EC2  
DevOps-enabled task manager deployed with CI/CD.
  - **ShopEase AI** – React, Node.js, Firebase  
E-commerce site with AI-powered product filtering and recommendations.
- 

## Education

### B.Tech in Computer Science

Koneru Lakshmaiah Education Foundation, Hyderabad (2022–2026)

CGPA: 9.04

---

## Certifications

- MongoDB Developer Associate
- AI Internship – Personify & 1Stop.ai
